

Linielson Rosa

SENIOR SOFTWARE ENGINEER

Profile

Web developer with more than a decade of experience in creating and maintaining systems. He has been working with Ruby on Rails for seven years. Focused on solving problems, producing tested, refactored, clean and effective source code. Dedicated to the development process, it does not dispense with the use of agile methodologies. Able to self-manage effectively during projects, as well as collaborate as part of a team. Willing to improve, grow and always deliver values to organizations.

Now he is dedicated to the study of the development of large-scale applications, with microservices, event driven, hexagonal architecture, and the study of the Go language.
